PRANAV S

SOFTWARE DEVELOPER

673305, Kozhikode, Kerala | pranavsudheesh34@gmail.com | Github | LinkedIn

SUMMARY

Results-driven software developer with a keen approach to building problem-focused solutions. Experienced in developing machine learning-based applications and crafting innovative web solutions. Strong proficiency in system-level coding, ensuring efficiency, scalability, and robustness in software development. Passionate about leveraging technology to drive meaningful impact.

TECHNICAL SKILLS

Machine Learning
Deep Learning
Neural Networks

Web Development
Scripting
Networking

PROJECTS

ReWiki

- Led development of a chat bot in a wiki site for a hackathon.
- ReWiki is a wiki site which was created as a part of a useless project hackathon.
- Integrated front-end, back-end and ML in this work.

Solution_Challenge_2025

- Developed a model to predict the afforestation possibilities in a location and provide out the success rates.
- This model was implemented from scratch using libraries like pandas, numpy and xgboost
- This was a hackathon conducted by Google.

EDUCATION

Bachelor of Technology   **Sep 2023 - Now**

College of Engineering Trivandrum

- Major in Computer Science and Engineering.
- Working in the Game Engine Development Department in the Game Development club.

ADDITIONAL INFORMATION

- **Languages:** English, Hindi, Malayalam
- **Certifications:** Supervised Machine Learning: Regression and Classification (Stanford | Online)
  Advanced Learning Algorithms (Stanford | Online)
